

Non-Violence Pledge

As a member of the local Republican Town Committee and inspired by Martin Luther King jr's non-violence requirement for the 1960's Civil Rights Movement, **I hereby pledge non-violence in all my political activities, including speech, actions and protest.**

I also condemn in the strongest possible terms the use of violence in political activities. We must never harm our neighbors or people with whom we disagree. We must never damage property. We must never damage or impede businesses or their products. We must never submit false reports or participate in "swatting" or doxing. We must never block roads or impede the free flow of traffic in order to make a political statement.

I will conduct all my political conversations with respect and with the intent to remain friendly with those in the discussion and with the intent to improve the situation for all in my community.

I encourage those who have participated in political violence to start the path of redemption. Stop the violence and change your behaviors to use non-violent means of communication.

On these things you have my commitment.
I encourage you to make a similar commitment.
